About PHP Web Development

Web Development is the most essential skill that employers are looking for in candidates today. Websites are the public interface of large companies and businesses which relate with the general masses and play a pivotal role in the growth and progress of a company. Web designing skills are so important that hefty packages

(If looking combined packaged course along with CMS i.e [Drupal](#), [Wordpress](#) , [Jquery.Ajax](#) , [Click here](#) .We Also provide our [video tutorial](#) for Drupal, Wordpress as course material)
Course Duration - 55 hours (3 to 4 month approx)

company. Web designing skills are so important that many packages are being paid to individuals with proper knowledge of [HTML5](#), [CSS](#), [JAVASCRIPT](#), [PHP](#), [RUBY](#) etc. Of these PHP is the most relevant and most used programming language. It is a fundamental web development language that can be used for both scripting web pages and also for general programming purposes also. It is the heart and core of many million websites and its global architecture has led to its
